Security Awareness for the 21st Century

"The SANS Securing the Human is very easy to use. The content is satisfactory and beneficial. The information is presented in a format that is interesting, and it is easy to follow and understand. I have received positive feedback from all of our users, and most have added that it will help them at home, as well as in the office."

Curt Hubbard

Department of Finance and Administration

"I recently completed all of the modules in the ITS Security Awareness Training Library and found them informative, not only for the workplace, but at home, and in public, as well."

The training modules are geared to all users, no matter what your IT background may be. They offer suggestions and helpful hints to protect you, the information that belongs to your agency, and the importance of protecting your information from cyber criminals."

Len Rutland

Department of Information Technology
Services

User awareness training is imperative to achieve a more cyber secure organization.

ITS is pleased to offer the opportunity to leverage via aggregate purchasing the SANS Securing the Human (STH) security awareness training program to state, local, territory, tribal, nonprofit entities and public education institutions at steeply discounted prices during the special purchase period.

The Securing the Human security awareness training program provides everything your organization needs for an effective security awareness program. This program can help ensure employees have a solid understanding of their agency's security policy, procedures and best practices.

ITS will purchase a two year subscription to the Securing the Human training program and invoice customers for the charges associated with the number of seats requested. Your final anticipated cost (based on response) will be approximately \$4 per seat. This price is based on the minimum aggregate of 1,250 seats.

Additional information on Securing the Human:

List of all modules -
